(a) peak margins vs. n
margin [m/s]
followers n
η_{cl}
η_{sd}
η_{str}: invariant in n
(b) forced stop: $\min_t H$ vs. n
$\min_t H$ [m]
followers n
η_{sd}
η_{str}
$H < 0$: guarantee lost
η_{cl}
(c) forced stop: infeasible time vs. n
infeasible time [s]
followers n
run length 40 s
η_{cl}
η_{sd}
η_{str}: feasible for every n
